

IN ITS FIRST YEAR, OVER 750,000 PATIENTS WERE PROVIDED WITH FREE HEALTHCARE SERVICES AT TEKİRDAĞ DR. İSMAİL FEHMİ CUMALIOĞLU CITY HOSPITAL

THE OPENING CEREMONY OF TEKİRDAĞ DR. İSMAİL FEHMİ CUMALIOĞLU CITY HOSPITAL, THE LARGEST HEALTHCARE FACILITY IN THRACE, WAS CELEBRATED ON ITS FIRST ANNIVERSARY

Since last year, Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital has become a center of attraction for Tekirdağ in every aspect, providing healing to its surroundings and becoming a health hub.

Within one year at Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital, services were provided to 757,732 patients. During the one-year period, there were 23,053 inpatient admissions, and a total of 23,322 surgeries were performed. The hospital witnessed 871 births within a year, and 482 patients received services in the health tourism category.

After its completion by Akfen Construction through the Public-Private Partnership (PPP) model, Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital, initiated by the Ministry of Health of the Republic of Turkey last year, is celebrating its first anniversary. An event was organized to mark the first anniversary of Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital, introducing Thrace to world-class advanced technology healthcare services.

Tekirdağ Deputy Governor Harun Kaya, Tekirdağ Metropolitan Municipality Mayor Kadir Albayrak, Süleymanpaşa Municipality Mayor Cüneyt Yüksel, Tekirdağ Provincial Health Director Dr. Ali Cengiz Kalkan, Akfen Construction Chairman of the Board Selim Akın, and other guests attended the event. Following the opening speeches, plaques were presented to successful healthcare workers, and the first-year anniversary cake of the hospital was cut.

OVER 750,000 PATIENTS SERVICED IN ONE YEAR

Within one year at Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital, services were provided to 757,732 patients. Within this number, 549,803 patients benefited from outpatient clinic services, while 205,963 received health services from the emergency outpatient clinic. The hospital had 23,053 inpatient admissions during the one-year period, with 3,609 patients admitted to the intensive care unit.

A total of 23,322 surgeries were performed at Tekirdağ Dr. İsmail Fehmi Cumalıoğlu City Hospital, including 404 brain and spine surgeries, 219 open-heart surgeries, and 2 Transcatheter Aortic Valve Implantations (TAVI) (a procedure to replace heart valves through the groin).

During the COVID-19 pandemic, the hospital bore the region's healthcare burden, treating 61,049 patients with COVID-19 and providing inpatient care to 3,517 COVID-19 patients.

Being an important gateway for cancer treatment in the Thrace region, the hospital conducted 1,807 PET scans, 2,947 gamma camera scans, and 10,500 radiotherapy procedures.

In the first year of Tekirdağ Dr. İsmail Fehmi Cumalıođlu City Hospital, 871 births were recorded, and 482 patients received healthcare services from the hospital under the health tourism category.
