Basic Quality Policy

The quality policy of Akfen Construction covers compliance with regulations, provision of services at high standards, transparency, satisfaction of stakeholders and business continuity.

- All employees are responsible for establishing a suitable quality management system, achieving compliance with the quality standards in the sector and ensuring its continuity.
- Each employee is responsible within the scope of his/her own tasks under the quality management system.
- By efficiently and smoothly managing quality management; services are provided in compliance with international standards, and fair and transparent market conditions are ensured. These goals include economic development, continuous improvement of product and service quality to ensure business continuity and provision of services.
- Following up technological developments closely and training our employees regularly are important for the continuity of our operations.
- Information about the qualifications of our services is shared with our stakeholders in an open and transparent way.
- According to our quality management approach, the situation at each level is regularly assessed and reported, and communication is established with the relevant departments within the organization.
