Board of Directors Diversity Policy

As Akfen Construction, we have been taking each opportunity to grow and strengthen our brands since the first day of our foundation. In this effort, an important part of our DNA is to empower our employees to develop our agile organization. Differences in terms of geographical background, skills, ethnicity, race, gender and culture are the main components of our story of success.

We have placed diversity and equality within our ethical rules (publicly published) that constitute the basis of and emphasize the importance of our way of doing business under the theme of commitment to universal human rights for all members of our Company.

This perspective is implemented at all levels of our organization starting from the board of directors. The election of our board of directors and managers based on these fundamental values of diversity and equality is an ongoing and daily target in all decisions.

We strongly believe that the value of strengthening corporate governance lies in the benefits that diversity and equality bring.
