Basic Climate Policy

A corporate culture that is focused on raising awareness and generating solutions for climate variability in all business processes is implemented and its continuity is ensured at Akfen Construction.

For this purpose, Akfen Construction:

- is determined to generate realistic solutions to proactively contribute to a sustainable future in line with its policies regarding all matters within the scope of climate variability.
- It conducts studies to raise awareness of all stakeholders, including employees and suppliers, regarding climate variability.
- It is essential to ensure that the determined targets and actions comply with and support international standards regarding climate variability.
